Re: R-03-17650-03 – Metroplex

Dear Dr. Periyasamy,

It has been brought to my attention that the water service to your establishment has been switched to bypass. This can only be accomplished by a person or persons who knowingly opened and closed two separate valves. By doing this, none of your usage has been metered for a minimum of two months.

In order to correct this situation, our service man was able to correct the valves, and a lock will be installed to make sure this situation doesn't occur again.

Also, I am enclosing a bill based on your previous billing cycles which will be used to determine the estimated amount of money that was due the City of Girard.

In order to resolve this amicably, I will expect full payment of \$13,704.43 by March 15, 2012. If this does not occur, further action will be taken including both criminal and civil sanctions.

Sincerely,

JERRY LAMBERT
Safety Service Director
